Khawaja Anas Javed

Data Science Undergraduate

hellowfromanas@gmail.com | github.com/hellofromanas | www.linkedin.com/in/hellofromanas | Pakistan

Nationality: Pakistani

PROFILE

BS Data Science student at Pak-Austria Fachhochschule. I build projects to practise what I learn: C++ and Python programming, data analysis, Power BI dashboards and local LLM / RAG workflows with Ollama, plus websites for real clients.

EDUCATION

Bachelor of Science in Data Science — Pak-Austria Fachhochschule IAST, Haripur

Oct 2025 – Present | EQF level 6

- Programming fundamentals using C++
- Object-Oriented Programming
- Discrete Mathematics and logical reasoning
- Probability and Statistics for data analysis
- Algorithmic thinking and problem solving
- Basic data visualization and interpretation

HSSC (FSc Pre-Engineering) — Abbottabad Public School and College

Aug 2023 – Aug 2025 | EQF level 4

- Computer Science: programming fundamentals, basic data structures
- Advanced Mathematics: calculus, trigonometry, coordinate geometry
- Physics: mechanics, electricity & magnetism, wave motion

SSC (Matriculation) — Abbottabad Public School and College

Mar 2021 – Mar 2023 | EQF level 3

- Mathematics, Physics and introductory Computer Science
- Analytical thinking and problem-solving

SKILLS

Programming: Python, C++

Data: Power BI

AI: RAG, Ollama, Claude Code

Web: HTML / CSS / JS

Tools: Git & GitHub, Microsoft Office, Canva

PROJECTS

Local RAG with Ollama (Python · RAG · Ollama)

Retrieval-Augmented Generation pipeline that runs fully locally: chunking, embeddings, vector search and cited answers from a local LLM.
https://github.com/hellofromanas/rag-ollama-local

Student Performance EDA (Python · pandas · Matplotlib)

End-to-end analysis workflow on a synthetic dataset: cleaning, visualization and a regression model written with NumPy.
https://github.com/hellofromanas/python-student-performance-eda

Sales Dashboard (Power BI) (Power BI · DAX · Power Query)

Star-schema data model, DAX measures and dashboard specification on synthetic sales data, validated against Python.
https://github.com/hellofromanas/powerbi-sales-dashboard

Student Management System (C++17 · OOP)

Console application for student records and grades with ranking, statistics, CSV storage and unit tests.
https://github.com/hellofromanas/student-management-cpp

Bilal Sports (Client website · HTML/CSS/JS)

Storefront website for a sports gear and sportswear shop in Havelian, deployed on Vercel.
https://bilalsports.vercel.app/ | https://github.com/hellofromanas/Bilal-Sports

Dr. Khalil Aesthetic Clinic (Client website · HTML/CSS/JS)

Website built for an aesthetic clinic, deployed on Vercel.
https://khalilaesthetics.vercel.app/

Noor Al Hidayah Quran Academy (Client website · HTML/CSS/JS)

Website for an online Quran academy, deployed on Netlify.
https://noor-al-hidayah.netlify.app/ | https://github.com/hellofromanas/noor-al-hidayah

EXPERIENCE & VOLUNTEERING

Freelance Web Developer — Client Projects

2025 – Present

Built and deployed responsive websites: Dr. Khalil Aesthetic Clinic (khalilaesthetics.vercel.app), Bilal Sports (bilalsports.vercel.app) and Noor Al Hidayah Quran Academy (noor-al-hidayah.netlify.app).

Team Member — Registration & Security — PAMUN

2024 – Present

Managed delegate registration workflows, verified participant credentials and coordinated on-site security for the Pak-Austria Model United Nations.

Team Member — Registrations — IEEE

2023 – 2024

Facilitated member onboarding, managed participant databases and supported workshops and campus events.

GOALS

- Build a strong C++ & Python project portfolio
- Master data structures and algorithms
- Ship RAG applications powered by local LLMs
- Contribute to open-source projects
